Penguin fact card

Penguins are birds that cannot fly. Their wings are stiff flippers that help them swim.

The emperor penguin is the biggest penguin and grows about 1.1 metres tall.

Penguins have thick waterproof feathers. The gentoo penguin can swim at about 35 kilometres per hour.

Penguins eat fish, squid and krill.

Most penguins live in the southern half of the world. The African penguin lives on the coasts of South Afric

Male emperor penguins keep the egg warm on their feet for about 65 days during the Antarctic winter.

Penguins huddle close together to stay warm in freezing wind.
